1. In a certain code BOARD is written as 53169 and NEAR is written as 2416. How is NODE written in that code?
(a) 2394 (b) 2894 (c) 2934 (d) 2694 (e) None of these
 2. What should come next in the following sequence of letters?
B B C B C D B C D E B C D E F B C D E F G B C D E F
(a) B (b) G (c) H (d) D (e) None of these
 3. In a certain code SPORADIC is written as QNORDJEB. How is TROUBLES written in that code?
(a) SQTNTFMC (b) TNQSRDKA
(c) TNQSTFMC (d) TFQSCMFT (e) None of these
 4. Four of the following five are alike in a certain way and so form a group. Which is the one that does not belong to that group?
(a) Mica (b) Zinc (c) Iron
(d) Chlorine (e) Aluminium
 5. If it is possible to make only one meaningful word with the first, the third, the fifth and the eighth letters of the word SHAREHOLDING. Which of the following will be the second letter of that word? If no such word can be made, give 'X' as the answer and if more than one such word can be made, give 'Y' as the answer-
(a) L (b) E (c) S (d) X (e) Y
 6. Four of the following five are alike in a certain way and so form group. Which is the one that does not belong to that group?
(a) 18 (b) 24 (c) 36 (d) 34 (e) 26
 7. If 'Green' means 'Yellow' 'Yellow' means 'White', 'White' means 'Red', 'Red' means 'Violet', 'Violet' means 'Black'; then which of the following will be the colour of human blood?
(a) Red (b) Black (c) Green (d) White (e) None of these
 8. How many such pairs of letters are there in the Word GLIMPSE each of which has as many letters between them in the word as in the English alphabet?
(a) None (b) One (c) Two (d) Three (e) more than three
 9. EARN is related to RANE and BOND is related to NODE in the same way as TEAR is related to
(a) AERT (b) ATRE (c) ARET (d) REAT (e) None of these
 10. How many such digits are there in the number 5831649 each of which is as far away from the beginning of the number as when the digits are rearranged in ascending order?
(a) None (b) One (c) Two (d) Three (e) More than three
 11. If 'x' means 'added to'; '÷' means 'multiplied by'; '+' means 'subtracted from' and '-' means 'divided by' then $24 + 36 - 12 \times 8 \div 4 = ?$
(a) 36 (b) 53 (c) 5 (d) -20 (e) None of these
 12. Four of the following five are alike in a certain way and so form a group. Which is the one that does not belong to that group?
(a) Coconut (b) Lotus (c) Lilly (d) Rose (e) Marigold
- Directions (13-15):**
- (i) 'P x Q' means 'P is brother of 'Q'.
 - (ii) 'P - Q' means 'P is sister of 'Q'.
 - (iii) 'P + Q' means 'P is father of 'Q'.
 - (iv) 'P ÷ Q' means 'P is mother of 'Q'.
13. Which of the following represents 'M is nephew of N'?
(a) N-K+M (b) NxK-M (c) N+KxM
(d) N-K+MxT (e) None of these
 14. How is T related to D in the expression : H + T ÷ R - D ?
(a) Nephew (b) Niece (c) Nephew or Niece
(d) Data inadequate (e) None of these
 15. Which of the following represents F is daughter of W?
(a) W ÷ R+F (b) WxRxRxF (c) W+RxRxF - T
(d) W+R-F+T (e) None of these

Directions (16-20): In each of the questions below are given four statements followed by four

conclusions numbered I, II, III and IV. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read all conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

16. Statements : Some bags are trunks.

All trunks are shirts.

Some shirts are book.

All books are shocks.

Conclusions : I. Some Shops are bags.

II. Some books are bags.

III. Some shops are shirts.

IV. Some shirts are bags.

(a) Only I and II follow (b) Only I and III follow.

(c) Only III and IV follow (d) Only II and IV follow

(e) None of these

17. Statements : All pens are chairs.

All flowers are chairs.

All chairs are trucks.

All trees are trucks.

Conclusions : I. Some trucks are pens.

II. Some trucks are chairs.

III. Some trees are pens.

IV. Some trees are chairs.

(a) Only I and III follow (b) Only I and II follow.

(c) Only III and IV follow (d) Only II and IV follow

(e) None of these

18. Statements : All desks are pillars.

Some pillars are towns.

All towns are benches.

Some benches are cars.

Conclusions : I. Some cars are towns

II. Some benches are desks.

III. Some benches are pillars.

IV. Some cars are pillars.

(a) None of these (b) Only I follows. (c) Only II follows

(d) Only III follows. (e) Only IV follows

19. Statements : All stations are houses.

No house is garden.

Some gardens are rivers.

All rivers are ponds.

Conclusions : I. Some ponds are gardens.

II. Some ponds are stations.

III. Some ponds are houses.

IV. No pond is station.

(a) Only I follows (b) Only either II or IV follows.

(c) Only I and III follow (d) Only I and IV follow

(e) None of these

20. Statements : Some towers are lanes.

Some lanes are roads.

Some roads are rivers.

Some rivers are jungles.

Conclusions : I. Some jungles are roads.

II. Some roads are lanes.

III. Some jungles are towers.

IV. No jungle is road.

(a) Only I follows (b) Only II follows.

(c) Only either I or IV follows (d) Only IV follow

(e) Only either I or IV and II follow

Directions (21-25): Study the following arrangement carefully and answer the questions given below-

B ↑ A M 3 # D 2 E K 9 \$ F @ N I T 4 1 U W © H 8 % V J 5 Y 6 * 7 R

21. How many such symbols are there in the above arrangements each of which is either immediately preceded by a letter or immediately followed by a letter but not both?
(a) None (b) One (c) Two (d) Three (e) More than three
22. If all the symbols in the above arrangement are dropped which of the following will be the twelfth from the left end?
(a) 9 (b) U (c) I (d) 1 (e) None of these
23. How many such numbers are there in the above arrangement each of which is immediately followed by a consonant but not immediately preceded by a letter?
(a) None (b) One (c) Two (d) Three (e) More than three
24. Four of the following five are alike in a certain way based on their positions in the above arrangement and so form a group. Which is the one that does not belong to that group?
(a) D K 3 (b) 4 N U (c) 8 J © (d) F K N (e) 5 * %
25. Which of the following is the seventh to the right of the eighteen from the right end of the above arrangement?
(a) H (b) 9 (c) % (d) E (e) None of these

Directions (26-30): In each question below is given a group of digits/symbols followed by four combination of letters lettered (a), (b), (c) and (d). You have to find out which of the combinations correctly represents the group of digits/ symbols based on the following coding systems and the conditions those follow. If none of the combinations correctly represents the group of letter/ digits, give (e) i.e. 'None of these' as the answer.

Digit/Symbol : 1 # \$ 9 8 6 % @ © 7 2 4 * 3 5

Letter code : B D E N I V R G H K T J P F A

Conditions :

- (i) If both the first and the last elements in the group are odd digits both are to be coded as 'Y'.
 - (ii) If the first element is a symbol and the last element is an even digit, the codes for the first and the last elements are to be interchanged.
 - (iii) If the first element is an odd digit and the last element is a symbol, both are to be coded as 'Z'.
 - (iv) If the first element is an even digit and the last element is an odd digit, both are to be coded as the code for the odd digit.

Directions (31-35): Each of the questions below consists of a question and two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and ---

Give answer

- (a) I the data in statement I alone is sufficient to answer the question, while the data in statement II alone is not sufficient to answer the question.
 - (b) I the data in statement II alone is sufficient to answer the question, while the data in statement I alone is not sufficient to answer the question.
 - (c) If the data either in statement I alone or in statement II alone is sufficient to answer the question.
 - (d) If the data in both the statement I and II together are not sufficient to answer the question.
 - (e) If the data in both the statements I and II together are necessary to answer the question.
31. How is M related to F?

Statements:

- I. F is sister of N who is mother of R.
- II. M has brothers of which one is R.

32. On which data in March was Pravin's father's birthday?

Statements:

- I. Pravin correctly remembers that his father's birthday is after 14th but before 19th March.
- II. Pravin's sister correctly remembers that their father's birthday is after 17th but before 21st March.

33. Among M, N, T, R and D each having different age who is the youngest?

- I. N is younger than only D among the.
- II. T is older than R and younger than M.

34. Village D is in which direction of village H?

Statements:

- I. Village H is to the South of village A which is to the South-East of village D.
- II. Village M is to the East of village D and to the North-East of village H.

35. How is 'food' written in a code language?

Statements:

- I. 'Always eat good food' is written as 'ha na pa ta' in that code language.
- II. 'Enjoy eating good food' is written as 'ni ha ja pa' in that code language.

Directions (36-40): In each of the following questions series begins with unlettered figure on the extreme left. One and only of the five lettered figures in the series. The two unlettered figures one each on the extreme left and the extreme right fit into the series. You have to take as many aspects into account as possible of the figures in the series and find out the one and only one of the five lettered figures which does not fit into the series. The letter of that figure is the answer.

Study the following question.

In this question the number of lines in the figures goes on increasing by one from left to right. If we got by this aspect of number of lines' only then there is no wrong figure in the series. But if we also consider the 'manner' in which the 'number of lines' in the figures goes on increasing from left to right we come to know that the figure No. 4) does not fit into the series. Therefore, 4) is the answer.

Directions (41-45): In each of the following questions, a related of figures is following by five lettered

pairs of figures. Select the pair that has a relationship similar to that in the unlettered pair. The best answer is to be selected from a group of fairly close choices.

Study the following question.

In this question element II of unlettered figure is related to the element I of the figure in a certain way. Element II has one side more than the element I. The pair in the figure No. 5 has the same relationship. Therefore, 5 is the answer. Now solve the following questions.

English Language**

Directions (151-165): Read the following passage carefully and answer the questions given below it. Certain words are given in bold to help you to locate them while answering some of the questions.

Thought it is commonplace to say we live in a globalised world, less well understood is that globalisation is taking place in stages. In the first stage as flows of capital and goods were liberated the benefits of globalisation e.g., technological advancements, flowed primarily to the developed world. As we enter the current newer age of mobility, people have begun to move across borders in great numbers in pursuit of economic security and a better life for themselves and to keep their families out of poverty. At the turn of the 20th century the United Nations estimates that approximately three per cent of the world's population is on the move, a similar scale the that witnessed in earlier eras. Growing economic inequality together with natural and man made crises prompt emigration. But this mobility has the potential to chip away at the vast inequalities that characterize our time and accelerate progress throughout the developing world. To take an example, last year migrants sent home \$264 billion triple all international aid combined. The freer movement of people helps to underwrite health care, education and grass roots entrepreneurship across the developing world.

It helps to oil the global economy. When industrialized nations need to recruit nurses or software programmers developing countries are often the source. Yet rather than look at how these gains can be harnessed to reduce poverty, governments have been slow to adapt. The result is burgeoning illegal immigration, and trafficking, social tension and intolerance, loss of faith in the government and the empowerment of criminal networks. Until a few years ago, migrants were paying exorbitant fees to send money home losing about 20% in transaction costs. Today though migrants move freely and easily thanks to easy access to low cost transport and the internet, affordable and rapidly advancing telephony and satellite television which keep them in constant touch with home. Banks easily and wirelessly transmit hard won and sometimes meager salaries instantly to their families. The flow of people until now mostly benefited richer countries and generated worries about brain drain and the violation of migrant rights in poorer ones. Global for a represent a step in the effort to harness the power of migration to advance development and increase our knowledge of how to make the migration equation work for all. Rather than focus on the negative consequences and recriminations of exploitation by development countries such summits provide an opportunity for all nations to come together and address these issue in a comprehensive, logical and rational way so that the benefits of migration are fully realised in both developing and industrialized countries. Countries may examine how dual citizenship laws can ease the way for migrants to play a bigger role in development by bringing their capital, knowledge and networks back home. Such efforts will usher in the third stage of globalisation where everyone can share in the world's prosperity.

32. 5; From I, His father's birthday is on 15 or 16 or 17 or 18th March.

From II, His father's birthday is on 18th or 19th or 20th March.

∴ Father's birthday is on 18th March.

33. 5; From I, D > N > T, R, M

From II, M > T > R

∴ The youngest is R.

34. 3; From I,

D is in N-W of H.

From II,

D is in N-W of H.

35. 4; From I, Always eat good food

→ ha na pa ta

From II, Enjoy eating good food

→ ni ha ja pa

∴ Code for 'food' cannot be known.

36. 1; In each subsequent figure the pentagon is rotated 90° clockwise and a additional small line made this is shifting two side in the same direction and coming inside to outside and then outside to inside respectively.

37. 2; In each subsequent figure the design of leave rotating 45° and 90° clockwise respectively and a new leaf is coming first forward side and then a new leaf is coming next backward side. This sequence is also continuing further respectively.

38. 3; In each subsequent figure all designs are slid half side clockwise and one design of backside and front side are coming new first and then one design of second place from backside and frontside also coming new in the next and then rest of middle three designs are coming new. These changing sequences are also continuing further respectively.

39. 4; In each subsequent figure the designs 'S' and 'A' made on the two lower side of hexagonal remain the same place and the designs made on rest of

side come inside to outside and outside to inside and then the designs made on two side of middle remain on the same place and then the designs made on two side of upper side remain on the same place and rest of four designs come inside to outside and outside to inside. This sequence continues further respectively.

40. 5; In each subsequent figure all designs slide half side anticlockwise and also change their formation as follows—

41. 5; The design rotates 180° from element I to element II of figure.
42. 5; The design rotates 90° clockwise and then reverses vertically in element II from element I of the figure.
43. 3; In element II of figure a new design comes outside of the design element I like this that inside design touches the design of outside.
44. 5; In element II of figure, the lower side design comes inside the upper side design similarly out of the two designs of element I.
45. 4; In element II of figure, the lower left part becomes shaded out of four equal part of the design of element I.
46. 2; In each subsequent figure, 2, 1, 2, 1 and 2 parts out of different parts on the design are becoming more shaded in anticlockwise direction and 5, 4, 5, 4 and 5 parts are becoming shaded from frontside in the same direction from last shaded part each time with this also.
47. 5; In each subsequent figure the three designs slide half-half side in this sequence '

51. 2; $(-251 \times 21 \times -12) \div ? = 158.13$

$$\Rightarrow \frac{63252}{?} = 158.13$$

$$\therefore ? = \frac{63252}{158.13} = 400$$

52. 2; $\frac{25.6}{100}$ of $250 + \sqrt{?} = 119$

$$\Rightarrow 64 + \sqrt{?} = 119$$

$$\Rightarrow \sqrt{?} = 119 - 64 = 55$$

$$\therefore ? = (55)^2 = 3025$$
